

BIS REGISTRATION FOR ELECTRONIC AND IT PRODUCTS

BIS Registration for Electronics Products is a crucial aspect when it comes to Electronic & IT products. It is a quality control compliance that is required for the protection, standardization, and quality marking of manufactured products. This compliance creates an accountable and traceable system that eventually accommodates consumers, creating a sense of assurance and trust.

The Bureau of Indian Standards (BIS) is responsible for managing the product certification scheme in India to ensure product quality, safety, and trust. BIS certification is not a universal standard for all products, rather, products are governed under a particular Indian Standard. Therefore, it is important to obtain BIS Licence for electronic product is your manufactured products to ensure compliance with Indian Standards and to gain the trust of your consumers.

Electronic Product Certification India BIS Licence promotes imports and domestic manufacturers by guiding them regularly with the correct specifications of the products to harmonize the flow and quality through certification and testing.

BIS Certification For Electronic & IT Products | Compulsory Registration Scheme

In 2012, the Department of Electronics and Information Technology (DeitY) introduced the Compulsory Registration Scheme (CRS) jointly with the Bureau of Indian Standards (BIS) to protect Indian consumers from spurious and substandard goods. The CRS scheme requires BIS registration for electronics and IT products before launching them into the market.

According to the BIS Compulsory Registration Scheme Orders, no one shall manufacture or store for sale, sell, import, or distribute goods that do not comply with the Indian standard specified in the order and do not bear the Standard Mark with a unique registration number obtained from BIS. Bis

Registration For Electronics and IT product certification come under BIS compulsory registration scheme. Therefore, it is important to obtain BIS Registration for Electronics to comply with the CRS scheme and ensure the quality of products produced by India's manufacturers.

BIS grants a license to the manufacturers to use or apply Standard Mark with a unique R-number on electronics and IT products. BIS Registration is based on your self-declaration of conformity for goods and articles as per Indian Standards.

The conformity assessment scheme outlined in Scheme II of Schedule II of the BIS (Conformity Assessment) Regulations, 2018 governs the grant of a license and its operation under the BIS Compulsory Registration Scheme.

To be precise, there is a total of 76 products category that have been recognized till now, out of which 63 products are added by MEITY, 5 by MNRE, and 8 by MHIPE. For your convenience, we are providing a BIS products list table with all the product names and Indian Standards required under the BIS compulsory registration scheme at the end of this article.

BIS Compulsory Registration Scheme

In this BIS Compulsory Registration Order (CRO), the ministry listed a total of 15 categories of electronic products in the 1st phase. Later on, the ministry issued five phases at regular intervals. In the last and latest phase (Phase-V), the central government included 7 more electronic products on 05 October 2020, which makes it a total of 63 Electronics and Information Technology products.

Not just that, other departments also added some of the products to the BIS REGISTRATION SCHEME like 5 products related to solar photovoltaics, systems, devices, and components which are added and regulated by the Ministry of New and Renewable Energy (MNRE), and 8 products related to low – voltage switchgear and control gear which is added by the ministry of heavy industries and public enterprises under BIS REGISTRATION.

If you are a Manufacturer of any electronic or IT product, then we are sure you immediately want to check beneath the table for your product specification under Indian Standards, and you could but don't miss the exact details with facts and figures we are about to present in this article. Your inquiries for the latest updates about BIS registration are always welcome at info@induceindia.com

Requirement of BIS Registration For Electronics Products

The following are the essential requirement of Bis Registration For Electronics & IT Products under CRS:

- First of all, if you are a manufacturer of any product included in the CRS Scheme, then registration is required for that product before launching them into the market.
- The manufacturer seeking to register to use or apply Standard Mark on their product shall conform to the requirements of Indian Standard Specifications.
- The BIS license will be granted to you by BIS based on your self-declaration of conformity of the product with the application you are submitting.
- This self-declaration of conformity from you indicates that your manufacturing infrastructure can produce quality products with necessary testing facilities which can test the products in the prescribed period at your premises only.

Documents Required For Bis Registration for Electronics & IT Products

The following documents are required for BIS Registration for Electronic & IT Products under CRS scheme.

1. Self-Declaration of Conformity
2. Test Report Conformity by Third-Party Testing Laboratory of Product Samples (Components and raw materials).
3. The Name and Address proof of the manufacturing unit along with the scope of business activity.
4. Copy of acknowledgment received from the portal

5.Details of Authorized Signatory and other related documents

6. Details of the samples to be tested by BIS

Also, the details of the product's Models/Varieties to be covered

Step by Step Guide

1. Generation of TRF(Test request form) through BIS Portal.
2. Submission of samples and relevant documents to initiate testing.
3. online filling with supporting sign-stamp documents.
4. evaluation of submitted application by BIS officer.
5. Granting of R-Number with registration letter

Gainful Grant of License

Now that all the submission with quality testing, Conformity, and Documentation work is in line. The Granting of Licence from BIS for Electronics is expected to be completed within 20 working days. In case the documentation and conformity are not satisfactory or in any deficiency at the first instance, the BIS concerned official will communicate with you the same with a rejection notice if the deficiency is not resolved within 30 days.

Why is BIS Certification Essential for Electronic Gadgets?

BIS (Bureau of Indian Standards) certification is a mandatory requirement for manufacturers and importers who wish to sell electronic products in India. This certification ensures that products comply with Indian safety and quality standards, protecting consumers from substandard goods.

Key Reasons to Obtain BIS Certification for Electronics

Product:

Legal Compliance – BIS certification is compulsory for selling electronics in India. Without it, your products cannot enter the market.

Consumer Trust – A BIS-certified product assures customers of safety, durability, and performance.

Avoid Penalties – Selling non-certified products can lead to fines, legal actions, or even a sales ban.

International Expansion – Many BIS standards align with global regulations, easing exports to other countries.

List of Electronic & IT Products That Require BIS Certification

Under the Compulsory Registration Scheme (CRS), BIS certification is mandatory for various electronic products, including:

IT & Computing Devices

Laptops, Tablets, and Notebooks
Automatic Data Processing Machines
Printers, Plotters, and Scanners
External Hard Disks & Solid-State Drives (SSD)
Wireless Keyboards & Smart Card Readers

Home Appliances & Consumer Electronics

Television Sets (LED, LCD, Smart TVs)
Microwave Ovens & Induction Stoves
Set-Top Boxes & Video Monitors
Music Systems & Home Theater Systems
Rice Cookers & Smart Kitchen Appliances

Power & Energy Storage Devices

UPS & Inverters
Power Adapters & Chargers for IT Equipment
NiCad (Nickel-Cadmium) & Li-ion (Lithium-Ion) Batteries
Power Banks

Security & Surveillance Equipment

CCTV Cameras & Surveillance Systems

Digital Video Cameras & Webcams

Lighting & Display Products

LED Lights & LED Modules

LED Luminaires

Wireless & Audio Devices

Bluetooth Speakers & Smart Speakers

Bluetooth Headsets, Earbuds & Wireless Microphones

Point-of-Sale (POS) Terminals

BIS frequently updates the list of mandatory products, so manufacturers and importers should stay informed to ensure compliance.

Types of Electronic Products Requiring BIS Certification

BIS certification is mandatory for a wide range of electronic products, including:

Television sets

Laptops, Tablets, and Notebooks

Mobile Phones

Microwave Ovens

LED, LCD Monitors

Electronic Video Games

Printers and Plotters

Power Adaptors for IT Equipment

Electronic Clocks

Amplifiers

Automatic Data Processing Machine

Music Systems

Scanners

Set Top Box

Video Monitors

Wireless Keyboard

POS Terminals

Power Banks

Smart Card Reader

LED Lights

LED Modules

Power Adapters

LED Luminaires

UPS, Inverters

NiCad Batteries

Li-ion Batteries

CCTV Camera

PV Module

Induction Stove

External Hard Disk

Solid State Drive

Rice Cooker

Wireless Microphone

Digital, Video Camera

Web Cam

Smart Speaker

Bluetooth Speaker

Bluetooth Headset, Earbuds

Steps to Obtain BIS Certification for Electronic Products

Step 1: Registration on the BIS Portal

Manufacturers or importers must register their company on the official BIS portal: <https://www.crsbis.in/> and provide essential details or must take consultancy with bis certification firm like Induce India.

Step 2: Application Submission

The applicant needs to fill out the BIS certification application and submit it along with mandatory documents, including:

Company registration certificate

Product technical specifications

Authorized signatory details

Test reports from BIS-accredited labs (if available)

Step 3: Product Testing

The product sample undergoes testing in a BIS-recognized laboratory to ensure compliance with Indian safety and quality standards. The lab will issue a test report after completing the evaluation.

Step 4: Application Review

BIS officials thoroughly review the submitted application, test reports, and supporting documents to verify compliance.

Step 5: Grant of BIS Certification

Once the application is approved, BIS issues a CRS certificate, allowing manufacturers to use the BIS Standard Mark (ISI mark or R Number) on their products.

Note: The BIS certification for Electronics Product is valid for two years and must be renewed periodically to continue compliance.

Frequently Asked Questions (FAQs)

1. Why is BIS certification mandatory for electronic products in India?

BIS certification ensures that electronic products meet safety, quality, and performance standards, protecting consumers from hazardous goods. It is a legal requirement under the Compulsory Registration Scheme (CRS) in India.

2. How long does it take to obtain BIS certification?

The BIS certification process typically takes 4 to 6 weeks, depending on the product category, testing duration, and application approval.

3. Can foreign manufacturers apply for BIS certification?

Yes, foreign manufacturers can obtain BIS certification under the Foreign Manufacturers Certification Scheme (FMCS) but must appoint an Authorized Indian Representative (AIR) to handle the application process.

4. What happens if a product fails BIS testing?

If a product does not meet BIS standards, manufacturers must make the necessary modifications and resubmit it for testing. Repeated failures can lead to rejection.

5. Does BIS certification apply to imported electronic products?

Yes, all electronic products (whether manufactured in India or imported) must comply with BIS regulations before being sold in the Indian market.

6. What are the penalties for selling non-BIS-certified electronic products?

Selling electronic products without BIS certification can result in fines, product recalls, and a permanent ban on distribution in India.

7. How often do I need to renew my BIS certification?

BIS certification is initially valid for two years and must be renewed based on product performance and compliance with updated standards.
